PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering student (CGPA 9.5/10) seeking an AI-LLM Internship. Works with large and small language models (LLMs and SLMs), prompt engineering and AI/LLM research, and builds LLM-powered applications using the Google Gemini API, LangChain and FAISS-based RAG pipelines, including an AI health advisor and a live PDF and research paper Q&A system. Experienced in Python machine learning, data analysis (Pandas, Matplotlib) and full-stack development. Completed a remote ML internship, documents work clearly and collaborates effectively with remote teams.

TECHNICAL SKILLS

AI / LLM / ML: Large Language Models (LLMs), Small Language Models (SLMs), Prompt Engineering, RAG, LangChain, FAISS, Google Gemini API, XGBoost, SVM, Random Forest

Languages: JavaScript (ES6+), TypeScript, Go, Python, SQL, C++

Data Analysis: Pandas, Matplotlib, Data Visualization, Data Preprocessing, Excel Reporting (SheetJS)

Cloud & Deployment: AWS, Vercel, Streamlit Cloud

Backend & APIs: Node.js, Express.js, Go, REST API Design, HTTP, MERN Stack, Authentication, Third-Party API Integration, Flask, FastAPI

Databases: SQL, PostgreSQL, MySQL (academic coursework), MongoDB, NoSQL, Supabase, Firebase, Database Design

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

Tools & Practices: Git, GitHub, CI/CD, Code Reviews, Debugging, Technical Documentation, Asynchronous JavaScript (Promises, async/await), Linux

Professional: AI / LLM Research, Technical Documentation, Remote Collaboration, Communication, Teamwork, Project Management

PROJECTS

ArogyaMitra AI - Multilingual AI Health Advisor | GitHub *Lead Developer*

Flask, Firebase, RAG, FAISS, Google Gemini API, Tailwind CSS

- Built a full-stack AI health chatbot with a Flask backend, Firebase and a Tailwind CSS interface, integrating the Google Gemini API (LLM) for natural language processing.
- Designed a custom RAG architecture with FAISS to ground LLM responses in accurate medical literature.
- Created a multimodal interface supporting voice, text and image inputs for symptom checking.

Smart PDF & Research Paper Q&A System (RAG) | GitHub | Live Demo *Developer*

Python, LangChain, FAISS, Google Gemini API, Streamlit

- Built a retrieval-augmented question-answering system for PDFs and research papers using LangChain, FAISS and the Google Gemini API (LLM).
- Deployed the application live on Streamlit Cloud with a public GitHub repository.

AttendX - Real-Time Attendance Tracking Web App | GitHub | Live Demo *Lead Developer*

JavaScript, Supabase, PostgreSQL, SheetJS, Vercel

- Designed and built a real-time full-stack web application that replaced manual attendance tracking and streamlined event operations and record-keeping for college events, managing 400+ concurrent attendees.
- Implemented secure authentication and PostgreSQL database management with Supabase, handling 1,000+ data logs with zero downtime.
- Developed multi-coordinator event management, CSV pre-registration uploads and automated Excel reports by branch and year for data analysis, reducing post-event analysis time by 60%.

EXPERIENCE

ML Intern, CodeAlpha (Remote) *Dec 2025 - Jan 2026*

- Applied machine learning techniques to build a Multi-Disease Prediction system in Python using SVM, XGBoost and Random Forest, with Random Forest reaching 98% accuracy.
- Developed a Credit Scoring model to assess financial creditworthiness, owning the full lifecycle from data preprocessing to final submission.

Freelance Web Developer, Billing System Web Application *Freelance*

- Diagnosed and fixed bugs in a billing and business-management web application with a Railway-hosted backend and an offline mock-data fallback, resolving defects and improving reliability.

Student Volunteer, Bapatla Engineering College *Feb 2025*

- Applied administrative and organizational skills to coordinate the Bectagon Tech Coding Event for 300+ attendees, increasing participant engagement by 25% and resolving participants' technical queries.

EDUCATION

B.Tech, Computer Science Engineering, Bapatla Engineering College, Bapatla, India | CGPA: 9.5/10 *2024 - 2028 (Expected)*

Intermediate (MPC), SASI Junior College, Velivennu, India | CGPA: 95.4% *2022 - 2024*
