PROFESSIONAL SUMMARY

Full Stack Developer and B.Tech Computer Science student (CGPA 9.5/10) who builds and deploys full-stack web applications with the MERN stack (MongoDB, Express, React, Node.js), Next.js, TypeScript and REST APIs, backed by MongoDB, PostgreSQL, MySQL, Supabase and Firebase. Shipped a real-time attendance platform used by 400+ concurrent attendees and an AI-powered health advisor with a custom RAG pipeline, all with public GitHub repositories and live deployments. Writes clean, maintainable code, takes part in code reviews, collaborates through Git and GitHub, and is seeking a remote Full Stack Developer role.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Asynchronous JavaScript (Promises, async/await), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

Backend & APIs: MERN Stack, Node.js, Express.js, REST API Design, Flask, FastAPI, Authentication, Third-Party API Integration

Databases: MongoDB, PostgreSQL, MySQL (academic coursework), SQL, NoSQL, Supabase, Firebase

Languages: JavaScript, TypeScript, Python, SQL, C++

Tools & Practices: Git, GitHub, Code Reviews, Debugging, Vercel, Streamlit Cloud, Linux

AI / ML: RAG, LangChain, FAISS, Google Gemini API, XGBoost, SVM, Random Forest, Data Preprocessing

PROJECTS

AttendX - Real-Time Attendance Tracking Web App | GitHub | Live Demo *Lead Developer*

JavaScript, Supabase, PostgreSQL, SheetJS, Vercel

- Built a real-time full-stack web application that replaced manual attendance tracking for college events, managing 400+ concurrent attendees.
- Implemented secure authentication and PostgreSQL database management with Supabase, handling 1,000+ data logs with zero downtime.
- Developed multi-coordinator event management, CSV pre-registration uploads and automated Excel reports by branch and year, reducing post-event analysis time by 60%.

ArogyaMitra AI - Multilingual AI Health Advisor | GitHub *Lead Developer*

Flask, Firebase, RAG, FAISS, Google Gemini API, Tailwind CSS

- Built a full-stack AI health chatbot with a Flask backend, Firebase and a Tailwind CSS interface, integrating the Google Gemini API for natural language processing.
- Designed a custom RAG architecture with FAISS to ground AI responses in accurate medical literature.
- Created a multimodal interface supporting voice, text and image inputs for symptom checking.

Smart PDF & Research Paper Q&A System (RAG) | GitHub | Live Demo *Developer*

Python, LangChain, FAISS, Google Gemini API, Streamlit

- Built and deployed a retrieval-augmented question-answering system for PDFs and research papers using LangChain, FAISS and the Gemini API, live on Streamlit Cloud.

EXPERIENCE

ML Intern, CodeAlpha (Remote) *Dec 2025 - Jan 2026*

- Built a Multi-Disease Prediction system in Python using SVM, XGBoost and Random Forest, with Random Forest reaching 98% accuracy.
- Developed a Credit Scoring model to assess financial creditworthiness, owning the full lifecycle from data preprocessing to final submission.

Freelance Web Developer, Billing System Web Application *Freelance*

- Diagnosed and fixed bugs in a billing and business-management web application with a Railway-hosted backend and an offline mock-data fallback.

Student Volunteer, Bapatla Engineering College *Feb 2025*

- Coordinated the Bectagon Tech Coding Event for 300+ attendees, increasing participant engagement by 25%, and resolved participants' technical queries.

EDUCATION

B.Tech, Computer Science Engineering, Bapatla Engineering College, Bapatla, India *2024 - 2028 (Expected)*

CGPA: 9.5/10

Intermediate (MPC), SASI Junior College, Velivennu, India *2022 - 2024*

CGPA: 95.4%
